

The Direct Resin Class

SPEAKER: Jason Smithson

27TH - 28TH SEPTEMBER 2024

9:00am - 5pm

Radisson Blu Hotel, Corballis, Dublin Airport

Course Overview:

A deep dive into anterior and posterior direct composite restorations: very intensive with 75% hands-on component.

Jason will share his 25-year experience of placing direct resin in a general practice setting with up to date evidenced-based literature support.

What you will learn:

The main problems encountered by all dentists in direct resin placement are:

- How to achieve invisible restorations which are indistinguishable from natural tooth structure,
- How to avoid post-operative sensitivity
- How to place adjustment-free restorations
- How to work in an efficient and profitable way.

Dentistry is a branch of medicine, which encompasses science, art, and mechanical engineering: the competent operator must master of all three disciplines.

Dr Smithson's presentation covers the art of the anterior direct composite describing the preparation, layering, and finishing protocols required to create a restoration that is invisible to the human eye.

This is followed by a more technical analysis of the process required to prepare and place a posterior composite resin restoration, which requires no or little occlusal adjustment, has firm proximal contacts, without post-operative sensitivity.

This presentation is suitable for all levels.

Hands On Components:

- The Class 1 simplified layering with The Occlusal Compass.
- The Class 2 complex layering
- The Complex Class 4 & Edge Bonding (Central Incisor)
- The Simple Resin Veneer (Lateral Incisor)

Biography:

Jason qualified at the Royal London Hospital in 1995; achieving a number of awards including The Constance Klein Memorial, The Stafford Millar, and The Malcolm Jenkins Scholarships, The American Association of Endodontics Prize and the Overall Award for Clinical Dentistry.

After spending 3 years in oral surgery residency in London and a further year practicing restorative dentistry in London's Harley Street Medical District, he relocated to Cornwall in the extreme southwest of England. Jason practices at Revitalise, Cornwall, UK where his main focus is microscope enhanced adhesive dentistry.

Jason has achieved Diplomat Status in Restorative Dentistry from the Royal College of Surgeons (England). He is on the Editorial Board of The Russian Journal of Esthetic Dentistry and the UK-based "Private Dentistry" Journal and has published numerous peer-reviewed articles on adhesive and aesthetic dentistry in both the UK and abroad. He is joint author of "Vertical Margin Finish Lines In Fixed Prosthodontics". Jason is Past-President and Founder of the British Association of Private Dentistry.

Two day course: 09:00–17:00

Incl. lunch & refreshments

Course Fee: €1,150

Course offers 12 hours CPD
