STELA THE TRUE AMALGAM ALTERNATIVE

Stela is an innovative high-performance self-cure composite that was designed from the ground up to replace amalgam.

15 Seconds preparation: Stela is applied in a simplified two-step process; primer, then composite. Stela as a working time of 1.5 minutes and a self cure setting time of 4 minutes.

- High compressive and flexural strength
- For use in class I, II, III and V restorations
- An unlimited depth of cure
- A gap-free interface
- Simple 2 step process
- No etching
- No need for a curing light
- Available in automix syringe or capsule
